ADMS 6 User Group Meeting

Wednesday 11th November 2026

Voco, Manchester

Agenda

10:00	-	10:30	**Registration** **Refreshments & Helpdesk**
10:30	-	10:40	Welcome, Model News and CERC News *CERC*
10:40	-	11:10	ADMS 6.1: new model features *Andrea di Antonio, CERC*
11:10	-	11:40	Optimum air quality assessments for environmental permit applications *Matthew Rowlinson, Environment Agency*
11:40	-	12:05	Modelling the impacts of buildings with pitched roofs on dispersion in ADMS *James O'Neill, CERC*
12:05	-	13:05	**Lunch & Helpdesk**
13:05	-	13:35	Inferring emissions from measurements: methods, software and applications *Victoria Hamilton, CERC*
13:35	-	14:05	Modelling in "Disaster Alley": a project for Xavier University of Louisiana's Investigative Stories Program *Helen Malmgren, Xavier University & Catheryn Price, CERC*
14:05	-	14:35	Modelling tips: surface characteristics affecting flow and dispersion *Rose Jackson, CERC*
14:35	-	15:05	**Refreshments & Helpdesk**
15:05	-	15:35	Nitrosamine assessment methodology; implications for planning and permitting *Rachel Whitty-Nesbitt, WSP*
15:35	-	15:55	An inter-comparison of methods for modelling deposition of ammonia from intensive farms *Martin Seaton, CERC*
15:55	-	16:00	Training and support update *CERC*
16:00			**Finish**
